

# 15th Swiss International Music Academy

Musikinsel Rheinau - Switzerland  
masterclasses - workshops - concerts

July 11th - July 20th, 2025

„Music and brain“ - lecture and talks  
with neurologist  
Prof. Dr. Jürg Kesselring

Prof. Dr. Jürg Kesselring was Head Physician for Neurology and Rehabilitation at the Valens Rehabilitation Centre for over 30 years and has published numerous specialist books and articles in specialist journals as an author and editor.

At SIMA 2025, participants will have the extraordinary opportunity to get to the bottom of the question of how our brain works (from the perspective of a musician), how it can be influenced, what “success” or “failure” can mean and much more during a lecture by Prof.

Kesselring followed by a discussion.

A passionate cellist himself, Prof. Kesselring provides highly interesting insights into the world of neurological processes that take place during the process of musical work, whether on stage or during practice.
